## ATLANTIS SHADE SHELTER WITH CHANGE ROOM FACILITIES

**Image above:** Public outdoor shower feature heavy duty stainless steel tapware with a time flow valve. A unique quality of our new Atlantis Shelter design is its suitability to water sports, and coastal recreational activities.

With the increased focus on recreational & outdoor activities Modus has recognized the need to provide high quality facilities that meet the requirement. Many of our beautiful coastal and regional destinations do not have the infrastructure to support the activities for which they are used.

Modus Australia specialises in providing such facilities, and understands the specific requirements for recreation areas. Our new **Atlantis Shelter with Change Room Facility** meets this need; offering external showers and change rooms combined with a sheltered barbecue and picnic seating area. Like all of the Modus Australia Toilet Buildings, this can easily be adapted to include additional universal access compliant amenities, or a range of options to meet the specific requirements of your project.
