Wood Look

Walls-external

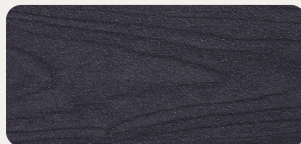

Our wood-look aluminium provides the perfect blend of style and sustainability, offering the natural aesthetics of timber without the environmental impact. Unlike traditional wood, wood-look aluminium is resistant to weathering, pests, and rot, ensuring longevity with minimal maintenance. It is a more sustainable choice that reduces deforestation and aligns with a commitment to environmental responsibility, making it ideal for projects that prioritize both beauty and eco-consciousness. **Here are our recommended options for colors and types to help you find the perfect match for your design needs.**

Spotted Gum

Black Bush Cherry*

Black Ash*

Driftwood*

* Will incur additional cost and lead time

Colour pairings

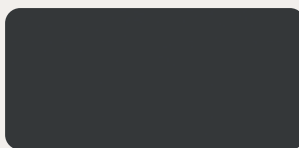

Use these colours to pair with wood look for applications such as slats and endcaps.

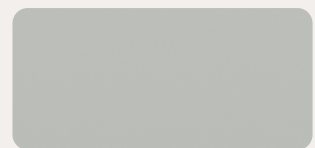

Desert Dream
